Another incredible way potential customers could visit your Web address is by typing "key words" into a Search Engine or Directory! "Key Words" are descriptive words that best represent the content of your Web Page/Site. For example, if your content was for a health product you might list: health, fitness, vitamins, workout, exercise, etc! Submitting your web address and a list of "key words" to several Search Engines and Directories could be a great way to maximize your exposure to millions of people "surfing the net"!
